

SESSION 1 - Web, Desktop & Mobile Application Testing (Foundations)

1. Flipkart Website Navigation

Ans:

- Navigated through Electronics, Fashion, and Home sections successfully.
- Each category loaded the relevant products and content.
- The webpage URL updated correctly after selecting different menu options.
- No broken links or loading issues were observed.

2. Login Form Validation

Ans:

- Required field warnings appeared when fields were left empty.
- Entering an improperly formatted email address triggered a validation error.
- Login attempt with incorrect credentials displayed an appropriate error message.
- Form validation worked as expected.

3. Notepad++ Installation Testing

Ans:

- Notepad++ was installed without any errors.
- A shortcut was automatically added to the Start Menu.

- Created and saved a text document in the Documents folder successfully.
- The saved file reopened correctly after closing the application.

4. Spotify Lite Application Testing

Ans:

- Spotify Lite installed and launched successfully on the emulator.
- The login page loaded without issues.
- UI components such as logo, text boxes, and buttons were displayed properly.
- Navigation within the app was responsive and stable.

5. Windows Calculator Testing

Ans:

- Opened multiple Calculator windows simultaneously.
- Performed separate calculations in each instance.
- Switching between windows did not affect stored calculations.
- Each calculator instance operated independently.
