

SESSION 2 – Responsive Testing & Cross Browser Testing

1. Zomato Responsive Testing

Ans:

- On iPhone 12 view, the navigation menu collapsed into a hamburger menu.
- On iPad view, content was displayed in a wider layout with larger spacing between sections.
- On Desktop view, the full navigation bar and additional content sections were visible.
- Images and banners adjusted automatically according to screen size.

2. Flipkart Breakpoint Testing

Ans:

- Around 1024px width, product cards became slightly smaller to fit the available space.
- Around 768px width, the multi-column layout reduced to fewer columns.
- Around 480px width, products were displayed in a single-column mobile-friendly layout.
- Navigation elements were simplified for easier mobile interaction.

3. Myntra Cross-Browser Testing (Chrome vs Firefox)

Ans:

- Homepage loaded successfully in both browsers.

- Minor font rendering differences were observed between Chrome and Firefox.
- Button styling and spacing appeared slightly different in Firefox.
- Images and banners displayed correctly in both browsers without layout issues.

4. BookMyShow Cross-Browser Testing

Ans:

- Tested on Chrome and Edge across desktop and mobile views.
- Navigation menus functioned correctly on all tested platforms.
- Banner images loaded properly without distortion.
- No major rendering or alignment issues were observed.
- Buttons remained responsive and clickable across browsers.

5. Responsive UI Issues Identification

Ans:

Issue 1:

- Problem: Text overlap in promotional banner.
- Device Size: 320px width.
- Suggested Fix: Increase text wrapping and responsive spacing.

Issue 2:

- Problem: Button partially hidden on smaller screens.
- Device Size: 375px width.
- Suggested Fix: Use flexible button sizing.

Issue 3:

- Problem: Horizontal scrolling appeared unexpectedly.
- Device Size: 360px width.
- Suggested Fix: Apply proper width constraints and overflow handling.

Issue 4:

- Problem: Product images appeared compressed.
- Device Size: 414px width.
- Suggested Fix: Maintain aspect ratio using responsive image settings.

Issue 5:

- Problem: Navigation menu items were too close together.
- Device Size: 320px width.
- Suggested Fix: Increase padding and spacing between menu items.

Result: Responsive and cross-browser testing was completed successfully. The websites adapted well across different screen sizes and browsers, with only minor UI inconsistencies observed.
